

04 April 2017

MSc/PhD position in OCT-guided intraocular drug delivery (Position ID: 001)

A Ph.D. or M.Sc. position is available at the Vision Health Axis - Maisonneuve-Rosemont Hospital Research Center (CRHMR). The student will join the newly-established laboratory of Dr. Christos Boutopoulos at CRHMR. The mission of the laboratory is to develop novel laser-assisted technologies for improved intraocular drug delivery and tissue engineering.

Project description

The student will develop an **intraocular drug delivery platform based on Optical Coherence Tomography (OCT) guided needles**. The platform will be evaluated for drug delivery in eye models, *ex-vivo* and *in-vivo*. The successful candidate will have a great opportunity to join an interdisciplinary research environment and get involved in translational research.

Student profile

- B.Sc. /M.Sc. degree(s) in biomedical or physics engineering, physics or related field
- Experience in lasers/optics is an asset
- PhD candidates: 1 research article (published or submitted)
- MSc candidates: knowledge of French is required
- Strong writing and communication skills in English (working language)

Non-registered students will be enrolled in the Biomedical Engineering program at UdeM.

Salary: According to the CRHMR salary range for graduate students.

Application: For additional information, please contact Dr. Boutopoulos by email. For applying, send us your CV, cover letter and university transcripts by email.

Application deadline: open until filled.

Dr. Christos Boutopoulos,
Research Investigator, CRHMR
Research Assistant Professor, Department of Ophthalmology, UdeM
5415 Assomption Boulevard, Montreal, QC H1T 2M4
